

5550 siaprime

setting new standards

5550 siaprime – setting new standards

The premium abrasive 5550 siaprime is designed for the particular needs of car manufacturing and body repair. Thanks to the innovative abrasive structure, performance and lifetime are improved significantly – for a faster and more cost-efficient target-achievement.

Advantages

- Best edge stability with film backing
- Maximum stock removal due to ceramic grits
- Minimal clogging due to special grit coating and optimised adhesive
- No grit shedding
- High layer and tearing strength
- Great flexibility ensures trouble-free sanding of edges
- Highly efficient and productive
- Good flatness due to high climate consistency

Applications

- Flattening of body filler, gelcoat and composite materials
- Sanding of lacquers and paints, steel, aluminium, plastic, hard- and softwood, mineral materials, etc.
