

2891 sianox

High-performance flap discs for high-alloy steel

2891 sianox – Specialist for high-alloy steel

This flap disc impresses with an optimised abrasive backing and a very powerful zirconia alumina. Together with a more efficient cooling effect, the 2891 sianox is a specialist for high-alloy steel.

Product profile

Material:	High-alloy steel
Grit:	Zirconia alumina
Grit range:	40 to 120
Backing:	X-wt cloth
Special coating:	Cooling additive
Coating:	Closed

Advantages

- Cool cut thanks to special Top-Size
- Time-saving thanks to the highest aggressiveness and the highest removal rate
- Cost reduction thanks to long lifetime
- User-friendly thanks to optimised demountability
- Grinding aids

Applications

- Welding preparation
- Removing discolourations
- Stock removal
- Surface sanding
- Deburring

Application

Highly recommended
Angle grinder
