

## the ideal combination for top performance and top finish

The high-tech belts of the special 3708 siapan series are ideal for calibration sanding, intermediate sanding and final sanding of plywood boards and blockboards as well as glued wood boards and switch panels.

### Advantages

- Suitable for the entire sanding process from coarse to fine sanding
- Fine sanding pattern thanks to stable backing
- Extremely long lifetime
- Gentle on sanding platen
- Backing with very high strength and stability
- Can be used as wide belt and segmented belt

### Applications

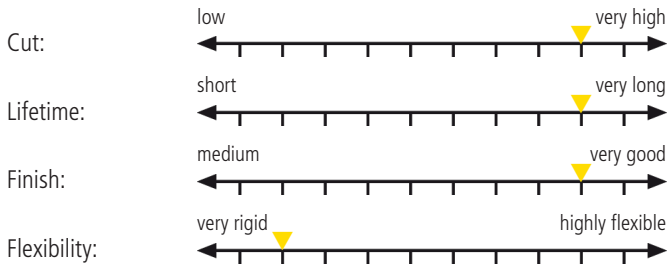

- Calibrating
- Intermediate sanding
- Fine sanding
- Keying of chipboards, MDF boards and hardboards
- Keying of laminate panels (back)
- Keying of plywood, wood core plywood and solid wood panels

### Product profile

Grit type: Silicon carbide  
 Backing: Paper / cloth combination  
 Coating: Electrostatic open P036 – P100  
 Closed P120 – P150  
 bonding: resin over resin  
 Equipment: TopTec

### Properties

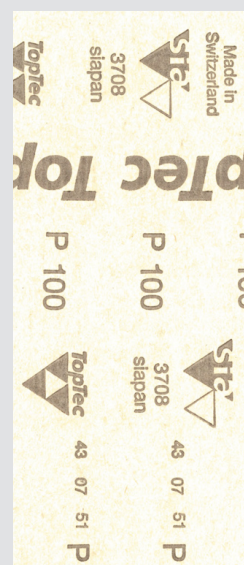

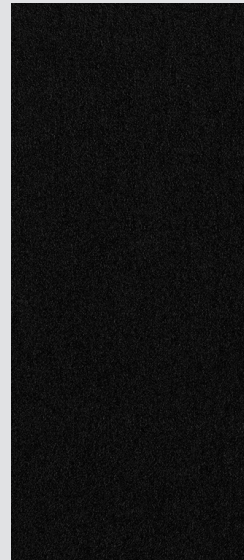

The following properties refer to the materials used in the main application:

### Materials

Chipboard; MDF board; HDF board; Wooden base; HPL laminate; Mineral fibreboard; Mineral material
