

high flexibility and edge stability for fine quality surface finishes in manual sanding applications

Whether it's non-ferrous metal or high-alloy steel – the sianor 2601 manual sanding series allows structuring and final sanding to a perfect scratch-free finish in next to no time. Also highly impressive: the fine polishing action.

Advantages

- Flexible but with stable edges
- Perfect surfaces, no random scratches
- Can be torn to any desired format
- Fine polishing action

Applications

- Removing discolouration
- Structuring and final sanding
- Finishing of watch cases and bracelets

Product profile

Grit type: Emery
 Backing: j-wt cloth
 Coating: Elutriated
 bonding: Hide glue

Properties

The following properties refer to the materials used in the main application:

Materials

Unalloyed / low-alloy steel; High-alloy steel; Non-ferrous metals
