

## for coarse dry sanding of hard to grind metals

Specially designed for coarse dry sanding, 2815 siaron achieves outstanding stock removal rates and long life, while its special cooling material helps to minimise discoloration during jobs such as deburring, material removal and preparation for welding on high-alloy steels and other hard to grind metals.

### Advantages

- Active additives with a cooling effect greatly reduce discoloration
- Backing with very high stability and rigidity
- Excellent performance and lifetime

### Applications

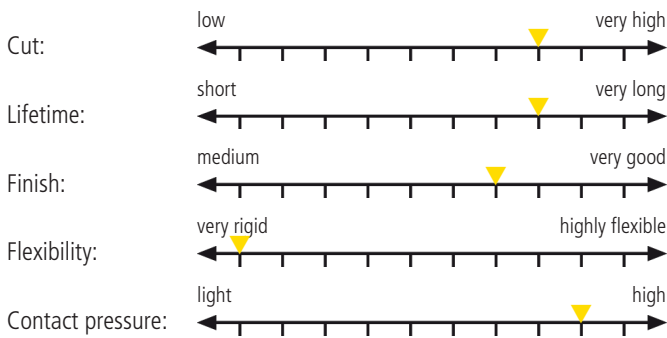

- Weld preparation
- Removing discoloration
- Sanding down
- Deburring

### Product profile

Grit type: Zirconia alumina  
 Backing: y-wt cloth  
 Coating: Closed  
 bonding: resin over resin  
 Coating: Cooling additive

### Properties

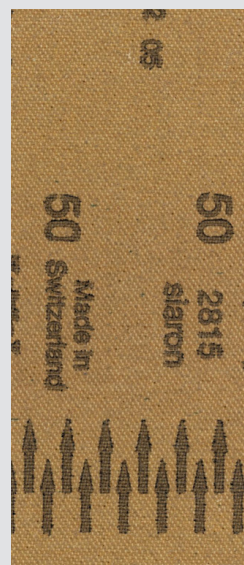

The following properties refer to the materials used in the main application:

### Materials

High-alloy steel; Other metals with poor chip removal properties
