

## maximum flexibility for ideal finishing results

6711 siafleece Flex is specially designed for keying in particularly hard-to-reach areas. It is highly flexible and ideal for applications such as scuffing of new parts, factory primers and lacquers before final painting.

## Advantages

- Highly flexible and adaptable to contours
- Consistent scratch pattern due to improved grain consistency
- Long lifetime
- May be used wet or dry
- Low clogging
- Minimised grit break-out

## Applications

- Scuffing of new components and factory primers
- Scuffing in hard-to-reach areas
- Scuffing of lacquers prior to final lacquering

### Product profile

|            |                  |            |
|------------|------------------|------------|
| Grit type: | Aluminium oxide  | very fine  |
|            | Silicon carbide  | ultra fine |
| Backing:   | Fleece           |            |
| Coating:   | Mechanical       |            |
| bonding:   | resin over resin |            |

### Properties

The following properties refer to the materials used in the main application:

### Materials

Colour; Varnish; Old lacquer; Primer coat; Plastics; Aluminium

### Application

◀ very fine

◀ ultra fine

**Area**  
Coatings and Composites

**Product line**  
Non woven abrasives
